ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v1935 strategy for VOXR is fundamentally broken, yielding a negative thirty-two point seven-three percent return with a zero percent win rate across only four trades. The minus one point one three Sharpe ratio and forty-five point eight-nine percent maximum drawdown confirm severe risk-adjusted underperformance. With such a microscopic sample size, the results lack statistical significance but clearly indicate a failed signal logic. Immediate termination is advised to prevent further capital erosion.
