ANALYST NOTE

Hera local LLM

This backtest is fundamentally broken. VOXR with EVO_GG1RSISNIP_v919 generated zero winning trades across four attempts, losing 32.73% of capital with a disastrous 45.89% drawdown. The Sharpe ratio of -1.13 confirms the strategy adds negative risk-adjusted value. A 4-trade sample size offers no statistical confidence, yet the 0% win rate is an unambiguous signal of strategy failure. Immediate disqualification and parameter overhaul are required before any further consideration.
