ANALYST NOTE

Hera local LLM

The VOXR backtest is fundamentally broken: zero wins across four trades with a -32.73% ROI and -45.89% drawdown. This isn't noise; the strategy failed to identify any profitable setup. The sample is too small to trust the Sharpe ratio or drawdown numbers, but the zero win rate is a hard signal that the entry logic is misfiring. Next, audit the trade timestamps against VOXR's price action to determine if the bot was chasing price or misfiring on support breaks, then rewrite the entry conditions.
