ANALYST NOTE

Hera local LLM

VOXR's backtest shows a catastrophic -32.73% ROI and 45.89% max drawdown with a zero percent win rate across only four trades, indicating a fundamentally broken strategy rather than temporary underperformance. The -1.13 Sharpe ratio and minuscule sample size render these results statistically meaningless and unreliable for any live deployment. This strategy requires immediate termination and a complete signal logic overhaul before any further testing on this asset.
