ANALYST NOTE

Hera local LLM

The VOXR backtest is a clear failure. Zero wins on just four trades, with a 45.89% drawdown and -32.73% ROI, rendering the Sharpe ratio meaningless. Such a tiny sample size offers no statistical confidence to trust the strategy. The complete lack of winning trades suggests the core signal logic is fundamentally broken. The immediate next step is to scrap the current parameters and completely rewrite the entry/exit logic.
