ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOG_v1661 strategy exhibits catastrophic failure with a -32.73% ROI and zero win rate across only four trades. Such a microscopic sample size renders the -1.13 Sharpe ratio and 45.89% drawdown statistically meaningless for future prediction. The complete absence of winning positions suggests fundamental signal logic flaws rather than mere market volatility. Immediate code review is required to diagnose why entry conditions never yielded profitable exits.
