ANALYST NOTE

Hera local LLM

EVO_EVOEVOEVOE_v1866 on VOXR is a catastrophic failure with zero wins and a forty-five percent drawdown, suggesting severe logic flaws. The negative Sharpe of minus one point one three confirms persistent alpha destruction rather than random variance. A sample size of four trades offers no statistical confidence, making it impossible to distinguish strategy error from bad luck. We must immediately halt deployment and audit the signal generation logic for structural defects before considering any further optimization.
