ANALYST NOTE

Hera local LLM

The VOXR strategy fails catastrophically with a 0% win rate and 45.89% drawdown across only four trades, rendering the results statistically insignificant. The negative Sharpe ratio of -1.13 confirms consistent capital erosion rather than random variance. Such a tiny sample size precludes any meaningful confidence in the strategy's viability or edge. Immediate code review is required to identify the fatal logic errors causing total signal failure.
