ANALYST NOTE

Hera local LLM

This backtest is a total failure, with a zero percent win rate and a forty-five percent drawdown destroying capital. The sample size of four trades is statistically meaningless, rendering the negative Sharpe ratio of -1.13 unreliable for any serious conclusion. The strategy failed to identify any profitable entries, suggesting a broken signal logic or severe overfitting to recent noise. Do not deploy this bot; the risk of ruin is immediate and the data offers no confidence in future performance. The only logical next step is to audit the entry conditions for VOXR to find the structural flaw causing every single trade to lose.
