ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1458 strategy on VOXR is a catastrophic failure, evidenced by a zero win rate and a thirty-two percent loss. With only four trades, the Sharpe ratio of negative one point one three and forty-five percent drawdown are statistically meaningless due to sample size insufficiency. The strategy failed to identify any profitable setups, indicating a fundamental flaw in signal generation logic. Immediate action requires abandoning this configuration and recalibrating entry criteria to improve directional accuracy. Do not deploy this bot until the signal manifest is rewritten to eliminate false positives.
