

Backtest #32176 · VOXR · EVO_GG1RSISNIP_v250

ROI	Sharpe	Win Rate	Max Drawdown
-32.73%	-1.13	0.0%	-45.89%

EQUITY CURVE 202 sessions · starting at \$9997.00

ANALYST NOTE

Hera local LLM

The VOXR backtest reveals a catastrophic failure, with a negative thirty-two percent return and a zero percent win rate across only four trades. The negative Sharpe ratio of minus one point one three confirms that losses consistently exceeded gains, while the forty-six percent drawdown indicates severe capital erosion. Statistically, this sample size is far too small to establish any reliable confidence in the strategy's edge or robustness. The EVO GG one RSI Snip version two fifty logic is fundamentally broken for this asset and requires immediate structural redesign. The next step is to expand the backtest period and increase trade frequency to validate whether any signal logic exists before further testing.
