ANALYST NOTE

Hera local LLM

The VOXR backtest for EVO_GG1RSISNIP_v1312 is a catastrophic failure with a -32.73% ROI and a -45.89% max drawdown. A 0.0% win rate across only four trades indicates zero statistical confidence and suggests the signal logic is either broken or fundamentally misaligned with current market regimes. Such a tiny sample size renders Sharpe metrics meaningless, yet the negative value confirms severe risk-adjusted underperformance. Immediate deprecation is necessary; the priority is debugging the entry logic rather than optimizing parameters to salvage a dead strategy.
