ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v1718 strategy on VOXR is a complete failure with zero wins and a catastrophic 45.89% drawdown. Such a 0% win rate across only four trades lacks statistical significance and indicates a severe logic flaw rather than market noise. The negative Sharpe ratio confirms the strategy lost money even when accounting for risk, rendering it unusable for capital preservation. We must immediately pause deployment and inspect the entry signals to identify why the bot never executed a profitable move.
