ANALYST NOTE

Hera local LLM

The VOXR GG1_RSI_Sniper strategy failed catastrophically, recording zero winning trades and a severe 45.89% peak-to-trough drawdown. With only four executed trades, the statistical sample size is insufficient to validate any signal logic or confirm systematic failure. The negative Sharpe ratio of -1.13 confirms that the strategy generated returns inferior to a risk-free asset. The RSI sniper logic likely entered on weak momentum signals without adequate trend confirmation. Immediate next steps involve pausing the bot, reviewing entry filters for RSI divergence, and increasing the minimum trade count threshold before re-evaluation.
