ANALYST NOTE

Hera local LLM

The VOXR GG1_RSI_Sniper strategy failed completely with a -32.73% ROI, zero wins, and a 45.89% drawdown across only four trades. Such a small sample size lacks statistical significance, rendering the negative Sharpe ratio of -1.13 an unreliable indicator of long-term performance. The strategy appears overly sensitive to noise in this specific volatility regime rather than capturing genuine trend reversals. We must halt autotrading immediately and recalibrate the RSI thresholds or implement stricter volume filters before redeployment.
