ANALYST NOTE

Hera local LLM

The VOXR backtest is a catastrophic failure: a -32.73% ROI and 0.0% win rate across only four trades indicate total strategy invalidity rather than market risk. The -1.13 Sharpe ratio and 45.89% max drawdown confirm severe capital erosion with no recovery mechanism. Given the microscopic sample size, these results lack statistical confidence but unequivocally signal a broken logic that requires immediate abandonment. I recommend deleting this bot configuration and rewriting the entry signals entirely.
