ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v1837 backtest on VOXR shows severe underperformance with a -32.73% return and zero winning trades. A maximum drawdown of -45.89% and a negative Sharpe ratio of -1.13 indicate a high-risk strategy that failed to preserve capital. With only four trades, the statistical sample is too small to draw robust conclusions about the strategy's long-term viability. The bot likely requires immediate parameter optimization or a fundamental reassessment of its entry logic. Do not deploy this configuration until the win rate and drawdown metrics show clear improvement.
