ANALYST NOTE

Hera local LLM

This backtest is a total loss — zero wins out of four trades, with a catastrophic 45.89% drawdown and a Sharpe ratio of -1.13. The 0% win rate across only four trades means the results are statistically meaningless, but the direction is unmistakably negative. The strategy failed to identify any profitable entry points for VOXR under v1420 logic. Next step: scrap this parameter set entirely and restart the mutation process with a fresh signal manifest.
