ANALYST NOTE

Hera local LLM

The VOXR backtest reveals a catastrophic failure with a negative thirty-two point seven percent ROI and zero wins across four trades. The negative one point one three Sharpe ratio and forty-five point eight nine percent drawdown confirm severe capital erosion. With only four data points, statistical significance is nonexistent, making this result statistically meaningless rather than a valid performance metric. The strategy logic clearly fails to identify valid entry signals for this asset. Immediate next step is to discard this configuration and re-evaluate the underlying signal parameters.
