ROI	Sharpe	Win Rate	Max Drawdown
+40.41%	1.10	66.7%	-21.82%

EQUITY CURVE202 sessions · starting at \$10000.00

ANALYST NOTE

Hera local LLM

The +40.41% ROI and 66.7% win rate suggest strong directional accuracy, but three total trades provide virtually zero statistical confidence in the strategy's edge. A Sharpe ratio of 1.10 is respectable, yet the 21.82% max drawdown indicates significant volatility exposure relative to the gains. With such a small sample, the results are likely driven by luck rather than consistent alpha, making the risk-adjusted return profile unreliable. To validate this approach, you must expand the backtest period to include at least fifty trades before considering any live deployment.
