ANALYST NOTE

Hera local LLM

The +12.63% ROI and 1.03 Sharpe ratio on BWB appear promising but are statistically meaningless given only two total trades. With a 50% win rate and a 9.20% max drawdown, the results likely reflect random variance rather than genuine edge or consistent strategy performance. The tiny sample size provides zero confidence in the underlying logic of EVO_EVOVELOCIT_v1513. You must run this strategy over a significantly longer historical period with hundreds of trades to establish any real statistical validity.
