ANALYST NOTE

Hera local LLM

The backtest shows a promising +40.41% ROI for LPG with a 1.10 Sharpe ratio and 66.7% win rate. However, the sample size of only three trades renders the statistical confidence negligible and the 21.82% max drawdown indicates significant risk. The high return is likely driven by a single outlier trade rather than consistent edge. To validate this strategy, you must expand the historical window to at least fifty trades to assess true reliability.
