ANALYST NOTE

Hera local LLM

The EVO_EVOEVOE_v2095 backtest on VOXR is a clear failure, delivering a -32.73% ROI with zero winning trades and a catastrophic 45.89% drawdown. Such extreme losses on a mere four trades indicate severe overfitting or a complete breakdown of the strategy logic under current market conditions. With a negative Sharpe of -1.13 and no statistical confidence in a sample this small, the results cannot support any deployment. The immediate priority is to halt execution, audit the signal generation rules for flaws, and revalidate the approach on a broader dataset before reconsidering any adjustments.
