

Backtest #41147 · LPG · EVO_EVOEVOEVOE_v2095

ROI	Sharpe	Win Rate	Max Drawdown
+40.41%	1.10	66.7%	-21.82%

EQUITY CURVE202 sessions · starting at \$10000.00

ANALYST NOTE

Hera local LLM

The +40.41% ROI on LPG is statistically meaningless due to the three-trade sample, which prevents any reliable inference of strategy edge. While the 66.7% win rate and 1.10 Sharpe ratio appear promising, they are artifacts of small-sample variance rather than robust performance. The 21.82% max drawdown is excessive relative to the returns, indicating poor risk-adjusted efficiency and high sensitivity to individual trade outcomes. This simulation lacks the statistical power to validate the EVO_EVOEVOEVOE_v2095 logic. Extend the backtest to at least 100 trades to establish a credible baseline before considering deployment.
