ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v2212 strategy on VOXR failed catastrophically, losing 32.73% of capital across only four trades with zero wins. A Sharpe ratio of -1.13 and a 45.89% maximum drawdown indicate severe structural flaws in the entry logic for this specific asset. Such a minimal sample size renders the results statistically insignificant, likely reflecting a single outlier failure rather than a consistent alpha signal. We must discard this configuration and re-evaluate the signal parameters or consider a different instrument entirely.
