ANALYST NOTE

Hera local LLM

The VOXR backtest for EVO_EVOEVOEVOE_v2180 failed catastrophically with a -32.73% return and zero winning trades. A single -45.89% drawdown across only four trades indicates severe overfitting or a fundamental strategy flaw rather than market noise. Statistical confidence is negligible given the tiny sample size, rendering the -1.13 Sharpe ratio meaningless for live deployment. We must halt this strategy immediately and conduct a parameter sweep to identify the root cause of the consecutive losses.
