ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v2158 strategy failed on META, delivering negative returns with a 33.3% win rate and a 21.75% peak drawdown. A sample of only three trades renders any statistical conclusion unreliable, making the Sharpe ratio of -0.45 meaningless without further data. The bot likely overfitted to specific noise rather than capturing genuine trend persistence in this volatile stock. Immediate action requires re-running the strategy with a longer historical dataset to validate signal robustness before deploying capital.
