ANALYST NOTE

Hera local LLM

The +40.41% ROI on LPG looks strong but the three-trade sample size renders the 1.10 Sharpe ratio statistically meaningless. A 66.7% win rate over only three executions is pure noise, not a signal of edge. The 21.82% drawdown is acceptable for a high-beta asset but cannot be validated without more data. You need at least 30 to 50 trades before this strategy has any credibility. Run a longer backtest on the same symbol with the same parameters to get a real sample.
