ANALYST NOTE

Hera local LLM

The EVO_WEBIDEA_v123 strategy on VOXR underperformed with a -2.01% ROI and a negative Sharpe ratio of -0.05, indicating no risk-adjusted edge. Statistical significance is negligible given only three trades, rendering the 33.3% win rate and 11.32% drawdown anecdotal rather than predictive. The strategy likely failed to capture sufficient alpha due to parameter misalignment with current volatility or entry timing errors. I recommend expanding the backtest to at least 100 trades to validate or discard the logic before live deployment.
