ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOG_v475 strategy on META failed catastrophically, recording a -17.50% return and a 33.28% drawdown across only three trades. A zero win rate and negative Sharpe ratio indicate the logic generated pure losses rather than identifying market inefficiencies. With such a tiny sample size, statistical confidence is nonexistent, rendering these metrics an unreliable indicator of future performance. The strategy must be retired immediately while the parameter space is re-evaluated to prevent further capital erosion.
