ANALYST NOTE

Hera local LLM

The LPG backtest for EVO_EVOEVOEVOE_v839 shows a +42.1% ROI with a 1.14 Sharpe, but extreme caution is required due to only three total trades. A 21.82% drawdown on such a small sample size creates high statistical uncertainty and risks overfitting to specific market conditions. The 66.7% win rate is statistically insignificant here and cannot validate the strategy's robustness without more data points. We must run a larger sample backtest or walk-forward analysis before deploying live capital.
