ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v646 strategy on RDN failed catastrophically, generating zero winning trades while eroding capital by 5.59%. With only three trades executed, the statistical sample is too small to draw any meaningful conclusion about strategy robustness. A maximum drawdown of 14.78% combined with a negative Sharpe ratio indicates severe inefficiency or a fundamental flaw in the logic. I must recommend re-evaluating the entry conditions and increasing the trade count before deploying live capital.
