This backtest for META using EVO_EVOEVOE_v655 is a catastrophic failure with zero winning trades and a 33.28% drawdown across only three executions. The negative Sharpe of -0.85 and -17.50% loss indicate severe structural flaws in the signal logic rather than temporary noise. With such a tiny sample size, statistical significance is nonexistent, rendering these results purely anecdotal evidence of a broken strategy. We must immediately pause deployment and audit the entry criteria to prevent further capital erosion on live markets.
