ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v664 strategy on RDN failed completely, delivering a -5.59% return and zero wins across merely three trades. Such a small sample size renders the -0.31 Sharpe ratio statistically meaningless and offers no confidence in the strategy's robustness. The 14.78% drawdown indicates a critical lack of risk controls during this brief testing window. We must expand the backtest period to accumulate sufficient data before drawing any conclusions about the bot's viability.
