ANALYST NOTE

Hera local LLM

The EVO_EVOEVOE_v699 strategy on META suffered a catastrophic failure with a 33.28% drawdown across just three trades, resulting in a 17.50% loss and zero wins. Such a tiny sample size renders the negative Sharpe ratio of -0.85 statistically insignificant and offers no confidence in the strategy's robustness. The absolute lack of successful entries suggests a critical flaw in the signal logic or an extreme adverse market regime. Immediate action is required to backtest this configuration against a wider dataset to determine if the failure is an anomaly or a systemic design flaw.
