ANALYST NOTE

Hera local LLM

The BWB · GG3_MACD_Momentum strategy generated a modest 2.15% return with a 33.3% win rate, yet the statistical significance is negligible given only three trades. The 0.25 Sharpe ratio and 13.41% maximum drawdown indicate that the signal logic is not robust enough to survive market noise. Such a small sample size prevents any reliable inference regarding the strategy's true expectancy or risk profile. A concrete next step is to expand the test period to accumulate at least 50 completed trades before evaluating the approach for live deployment.
