ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1148 backtest on RDN shows a catastrophic failure with zero winning trades and a 14.78% drawdown, indicating the logic is fundamentally misaligned with current volatility. With only three trades executed, the Sharpe ratio of -0.31 lacks statistical significance and cannot confirm strategy efficacy. The strategy failed to generate any positive alpha, resulting in a -5.59% return that erodes capital unnecessarily. Immediate action requires pausing deployment and conducting a deeper review of the signal thresholds to understand why no profitable opportunities were captured.
