ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1178 strategy failed to generate alpha on VOXR, producing a negative ROI of -2.01% and a non-functional Sharpe ratio of -0.05. With only three trades executed, the statistical sample is insufficient to validate any edge or signal reliability. A 33.3% win rate combined with an 11.32% drawdown suggests the entry logic lacks robustness against current volatility. Re-parameterizing the entry thresholds or filtering by volume regimes is the necessary next step before redeployment.
