ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v1937 strategy shows a 42.1% ROI, yet the 3-trade sample renders the 1.14 Sharpe and 66.7% win rate statistically insignificant. A 21.82% drawdown confirms that the high returns are driven by outlier wins rather than consistent execution. This performance is likely noise rather than a replicable edge given the lack of trade diversity. We must expand the sample size to validate the signal logic before deploying live capital.
