ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v624 strategy delivered a 42.1% ROI with a 1.14 Sharpe ratio, yet the 21.82% drawdown on only 3 trades reveals severe statistical fragility. A win rate of 66.7% is meaningless without volume, creating a high risk of overfitting rather than genuine alpha. We cannot trust these metrics until we validate robustness across significantly more market cycles. The immediate next step is to backtest LPG using a rolling window approach to verify if performance persists beyond this small sample size.
