ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v729 strategy on META failed catastrophically, eroding capital by 17.5% across only three trades. A zero win rate and a 33.28% drawdown indicate a severe regime mismatch rather than a lack of statistical significance. Such a sparse sample size precludes any meaningful confidence intervals or risk-adjusted performance metrics. Immediate action requires pausing deployment and recalibrating entry logic to avoid further exposure. The bot must be retired until the signal generator demonstrates positive expectancy in out-of-sample data.
