ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1199 strategy failed decisively on META, losing 17.50% capital with a 33.28% drawdown across only three trades. A zero win rate and negative Sharpe of -0.85 indicate severe regime mismatch rather than statistical noise. Such a tiny sample size invalidates any claim of robustness, suggesting the logic requires immediate parameter pruning or a different asset class. Re-run the backtest with tighter stop-loss constraints or a higher minimum trade count filter before live deployment.
