ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1288 strategy on VOXR failed catastrophically with a -2.01% ROI and -0.05 Sharpe ratio, driven by three losses that pushed max drawdown to 11.32%. With only three trades, statistical significance is nonexistent, rendering the negative win rate of 33.3% and low final capital of \$9,801.86 unrepresentative of long-term performance. The strategy lacks robustness and requires immediate parameter optimization or a complete logic overhaul before live deployment. Conduct a deeper walk-forward analysis or discard the approach to avoid unnecessary capital erosion.
