ANALYST NOTE

Hera local LLM

The perfect 100% win rate on a single trade is statistically meaningless and masks extreme exposure risk. A 10.67% drawdown on one position indicates a lack of diversification and robust stop-loss logic. The low Sharpe ratio of 0.47 confirms the strategy lacks statistical confidence for institutional deployment. We must execute a broader backtest with a minimum of 1,000 trades to validate performance consistency.
