ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v567 strategy failed to capture value in VOXR, posting a negative ROI of -2.01% and a Sharpe ratio of -0.05. With only three trades recorded, the 33.3% win rate and 11.32% drawdown lack statistical significance and cannot reliably predict future performance. The sample size is too small to rule out random noise or a temporary market regime mismatch. I recommend increasing the trade count or adjusting parameters to validate edge before deployment.
