ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v662 strategy generated a 36.29% return with a 66.7% win rate, yet the sample size of three trades is insufficient to validate statistical significance. A 21.82% maximum drawdown suggests high volatility exposure that could erode gains in live markets despite the 1.04 Sharpe ratio. The performance relies heavily on a single trade outcome rather than consistent execution patterns. We must run a walk-forward analysis or increase the historical lookback to confirm robustness before deployment.
