ANALYST NOTE

Hera local LLM

The ETH/USD backtest for the Astute AST Engine Bot failed, delivering a -32.47% ROI with a catastrophic 37.64% maximum drawdown. With only three total trades, the dataset is statistically insignificant, rendering the negative Sharpe ratio of -1.45 and 33.3% win rate unreliable indicators of future performance. The strategy likely suffered from overfitting or poor parameter selection during a volatile market regime where mean reversion signals triggered premature exits. We must expand the sample size by increasing the lookback period or adjusting leverage constraints before deploying capital live.
