ANALYST NOTE

Hera local LLM

The Astute AST Engine backtest on UNI/USD shows catastrophic failure with a -22.93% ROI and a dismal 25% win rate. Only four trades occurred, creating an insufficient sample size to derive any meaningful statistical confidence or risk parameters. The strategy suffered a severe 37.56% maximum drawdown, indicating extreme volatility exposure that the model failed to mitigate. Given the negative Sharpe ratio of -0.83, the strategy generated more drawdown than return over this period. The immediate next step is to discard this configuration and re-optimize entry filters to reduce overfitting to noise.
