ANALYST NOTEHera local LLM

The EVO\_EVOEVOEVOE\_v727 strategy generated an 18.35% ROI with a 66.7% win rate on ASC, yet the 17.18% maximum drawdown highlights significant volatility risk. Statistical confidence remains low due to only three executed trades, rendering the 0.82 Sharpe ratio insufficient for institutional deployment. The strategy lacks robustness in adverse market conditions, suggesting the entry logic may be overfitted to recent noise. A mandatory next step is to expand the sample size via extended backtesting across multiple market regimes before any live allocation.
