ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v311 strategy failed catastrophically on META with a -17.50% ROI and zero winning trades, indicating a complete breakdown in signal logic. A maximum drawdown of 33.28% suggests aggressive position sizing or unfiltered entry points that ignored market context. With only three trades executed, the statistical sample is negligible, rendering the Sharpe ratio of -0.85 meaningless for performance evaluation. The strategy likely requires fundamental parameter recalibration or a stricter trend filter before retesting.
